

CERTEX
Lifting Products and Services

Global Standards, Local Service

- ◊ Buy or hire the very latest quality wire rope and lifting gear
- ◊ Benefit from accredited training & maintenance and inspection
- ◊ Challenge us to find a solution to your most problematic lifting requirements
- ◊ Be assured that health and safety is our number one priority

CERTEX

A Legacy Worth Sharing

CERTEX has been providing lifting gear to oil and gas producers for almost half a century.

We are privileged to have worked with energy companies of all sizes over this time, continually developing our understanding of the rigorous demands of your industry and keeping health and safety at the forefront of everything we do.

In fact, you could say that health and safety is in our DNA. Energy is an exacting and dynamic market to be involved in and with a presence in several of the world's leading oil fields our engineers are well-placed to stay ahead of technical changes while still exceeding the health and safety requirements laid down by European legislation.

Be it rope, lifting gear, or statutory maintenance and inspection, CERTEX welcomes the challenge of finding safe and efficient lifting solutions for the most demanding situations.

We don't claim to know everything; but when it comes to safe lifting, we know more than most.

We call it our **Lifting Know-how** – our most valuable legacy.

Let our expertise become a part of yours.

- Unprecedented stock levels distributed worldwide
- Personal service from point of ordering through to delivery
- Field engineers offering practical advice and support
- Personal customer care, including training and inspection services

Global Standard

The Very Best of Both Worlds

CERTEX is made up of a group of specialist international lifting companies around the world. We have distribution centres in more than 40 European locations, not to mention additional bases in Russia, Estonia, Latvia, and beyond.

Between us we have an agreed commitment that our customers will always benefit from our global strength without it detracting from the personal service for which CERTEX is renowned.

Hence our overriding promise: **'Global Standards, Local Services'**.

It is not just a 'sales talk'. CERTEX's collective buying power means greater stock at better prices for our customers, while our global distribution system enhances choice and efficiency. Yet, first and foremost, it is our relationships with our customers at local level that we value the most. We have locally-based representatives visiting customers in person each working day, not to mention an army of field engineers working hard for our customers, around the clock.

We believe it is possible to have the best of both worlds.

s, Local Service

CERTEX
Lifting Products and Services

- 
- Choose quality goods from leading manufacturers
 - Get the latest technical information and advice
 - Use our turn-key service to get the rope for the job
 - Try the RopeTex range – CERTEX's own trustworthy brand

Quality Wire Rope

A Product for Every Situation

CERTEX has the largest steel wire rope store in Europe. Not only do we provide exactly the right product for every application, but our expertise in rope usage and the product advice we are able to offer, are second to none.

Every lifting job off-shore is challenging, and we have the best available high performance ropes for the most extreme situations, be it deep waters; high endurance, or demanding breaking strengths.

Our specialist procurement team works closely with manufacturers to ensure all our wire ropes achieve optimum quality. All our supplied wire rope meets stringent European standards and will arrive at your premises as quickly as possible. We also offer a turn-key service where we source and prepare a rope to suit your needs.

CERTEX engineers are able to oversee all routine maintenance keeping your lifting operations legally compliant and re-certifying ropes for continued use.

- ◊ **Select from 50,000 of the very best lifting products**
- ◊ **Buy or hire – whichever suits you best**
- ◊ **Benefit from our global fast ordering system**
- ◊ **All top brands delivered worldwide**

The Best Lifting

Tried and Tested Over Time

CERTEX has been supplying and developing lifting equipment for more than five decades. The knowledge and experience gained during this time enables us to achieve the best out of each product we supply.

Our current catalogue exceeds 50,000 items and covers every conceivable lifting gear component from lifting beams for cranes, swivels and crane blocks; through to accessories including clamps and magnet lifters, and essential lifting hardware such as shackles, eyebolts, lifting rings and rigging screws.

We also supply wire, chain, textile and fibre rope slings; fibre ropes for marine use; and a full range of height safety equipment covering harnesses, lanyards and fall arrest gear including abseil and evacuation devices.

Needless to say, you can expect to see all the leading brands within our product range, which includes our own quality range 'PowerTex'.

You can purchase or rent equipment from us, and with rental contracts we take responsibility for the routine inspection and repair of your goods keeping them legally certified during their life cycle.

Products

Inspect

- Stay in line with health and safety law
- Enjoy the convenience of our on-site service
- Have access to one of the largest test benches available
- Reach new heights with CERTEX's Rope Access people

ion and Testing

Leading the Way Across Europe

Nowhere is the legislative inspection and testing of lifting components more vital than in the risky world of oil and gas. Complex lifting scenarios and harsh conditions make the safe use of all equipment paramount.

That's why CERTEX has taken its inspection and testing facilities to the next possible level. We have one of Northern Europe's largest test benches built to handle a pulling force of up to 1200 tonnes. We can break test up to 960 tonnes and carry angle tests on spreader beams up to 500 tonnes.

We also have some of the world's best level 3 Rope Access Abseilers who can safely reach the highest and most exposed situations without the aid of scaffolding.

Our field engineers are available to carry out non-destructive testing and the inspection of all fixed lifting gear on your premises. Compliant inspection reports and certificates are all part of the service.

It is specialist services like these that make us pretty dynamic when it comes to keeping your lifting operations lawful and safe.

Repair and

- Use our 'as new' repair services to prolong product life
- Be reassured that we will keep your stock compliant
- Request one-off repairs or full stock maintenance
- Receive local service with rapid response times

and Maintenance

A Clean Bill of Health for Every Customer

With any lifting system the key to longevity is to have the right products for the job and then to take good care of them over time.

At CERTEX we will work with you to achieve this on both counts.

Our Lifting Know-how ensures that you will always be recommended the best possible components for any application, but we go further still with an efficient repair service designed to keep your equipment healthy and complaint, year after year.

Maintenance work is so often integral to successful legislative inspection and certification and we handle one-off repairs through to total stock management programmes. We don't want your products to be out of action any longer than you do, so our repair centres across Europe promise a rapid turnaround with collection services; 'new for old' options, and short term hire.

And it goes without saying – repairs are performed by skilled engineers using quality spares from genuine manufacturers.

- ◊ Access our unique software system for your lifting gear certification
- ◊ Make tangible cost savings with no paperwork
- ◊ Enjoy stress-free audits and less product downtime
- ◊ Put the legislative burden on us

Introducing Cert

A Certified Success

Imagine a system where all your lifting gear certification is managed in one place. That system exists in cyberspace and you can access it any time from any mobile device. Your product data is constantly up to date and your certificates can be viewed in seconds.

Add a few useful features – such as a simple ‘data summaries’; colour coding for defective items, and a warning system flagging up inspection deadlines – and you can soon see the value of CertMax+ our own revolutionary software programme for the total management of lifting gear certification.

Our customers tell us that CertMax+ radically enhances the way they operate, reducing in-house administration; improving safety, and adding to their bottom line, particularly with large volumes of gear across different sites and off-shore rigging lofts.

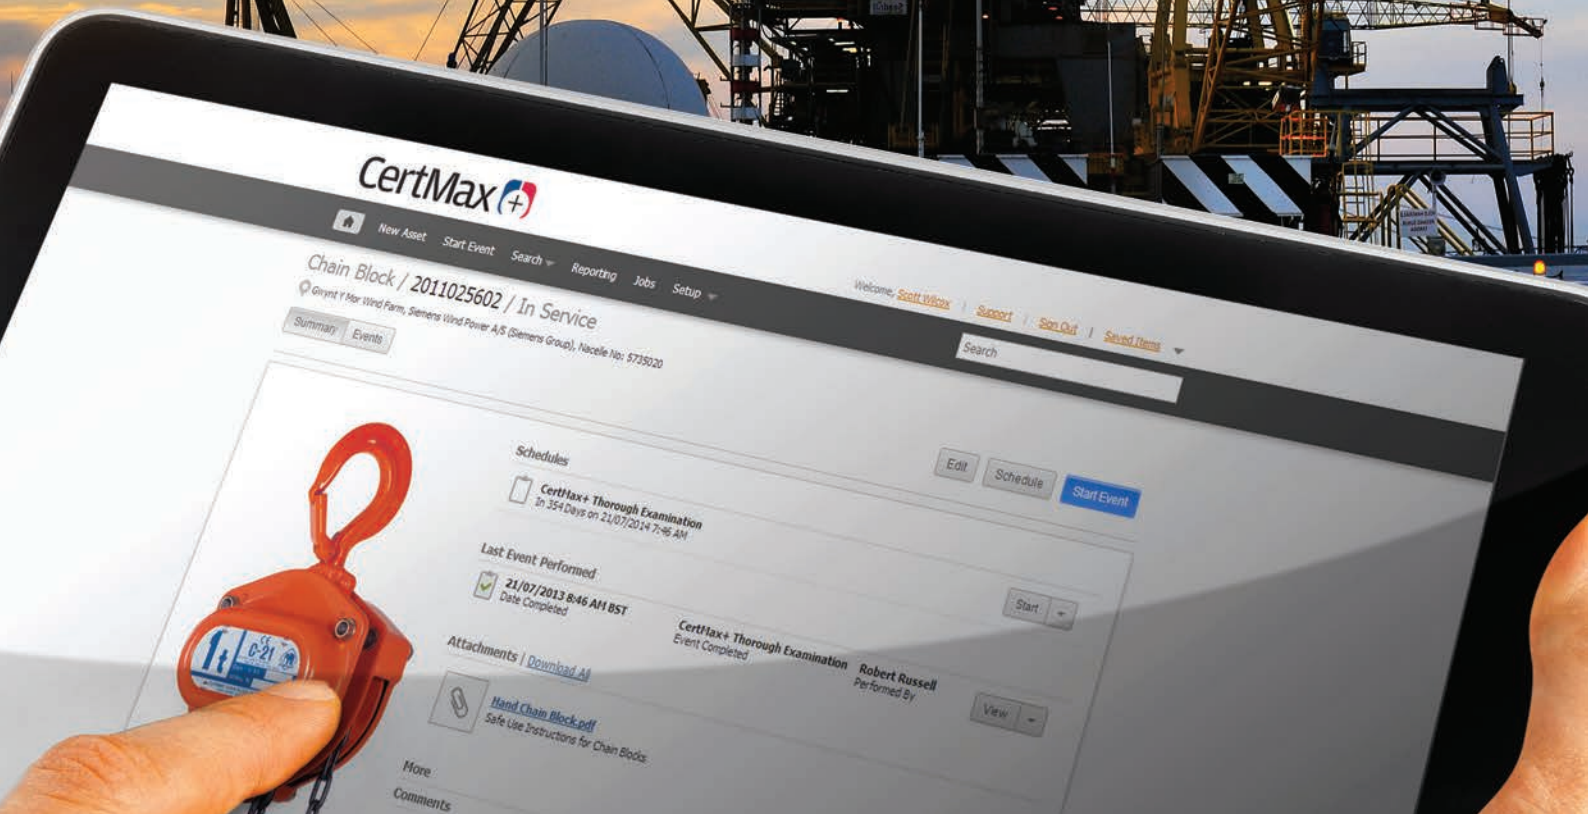

They like the fact that it eases the legislative burden and takes away the tedium of costly paperwork.

With CertMax+ we know we have something different.

We’d be delighted to demonstrate it to you.

More Comments

- ◊ Select from our extensive portfolio of accredited courses
- ◊ Stay ahead of important changes in lifting legislation
- ◊ Keep even your most experienced people motivated and refreshed
- ◊ Minimise downtime with training on your premises

Accredited Tra

Keeping One Step Ahead

On and off-shore lifting operations are subject to complex operational and safety regulations and companies have a statutory requirement to comply.

This is where CERTEX's **Lifting Know-how** comes to the fore. Our long involvement with the energy industry has allowed us to work closely with regulatory bodies to develop accredited lifting courses designed specifically for oil and gas.

From shop floor operators through to senior managers, we offer up-to-date, industry-approved training in all aspects of lifting operations; health and safety and examination and inspection.

Our accredited trainers offer a practical approach to learning and our dynamic and compact courses can be delivered at one of our many Lifting Centres, or on your own premises, wherever you are. Our courses are also tailored to meet the latest lifting regulations applicable in your country.

Whatever your training requirements – be it Appointed Person; Lift Supervisor; Crane Operator; Risk Assessor; Wire Rope Examiner; Rigging Loft Management, or Height and Rescue Training – an acclaimed course from CERTEX can have a positive impact on performance and profitability.

ining

We reach **Across Europe** and beyond

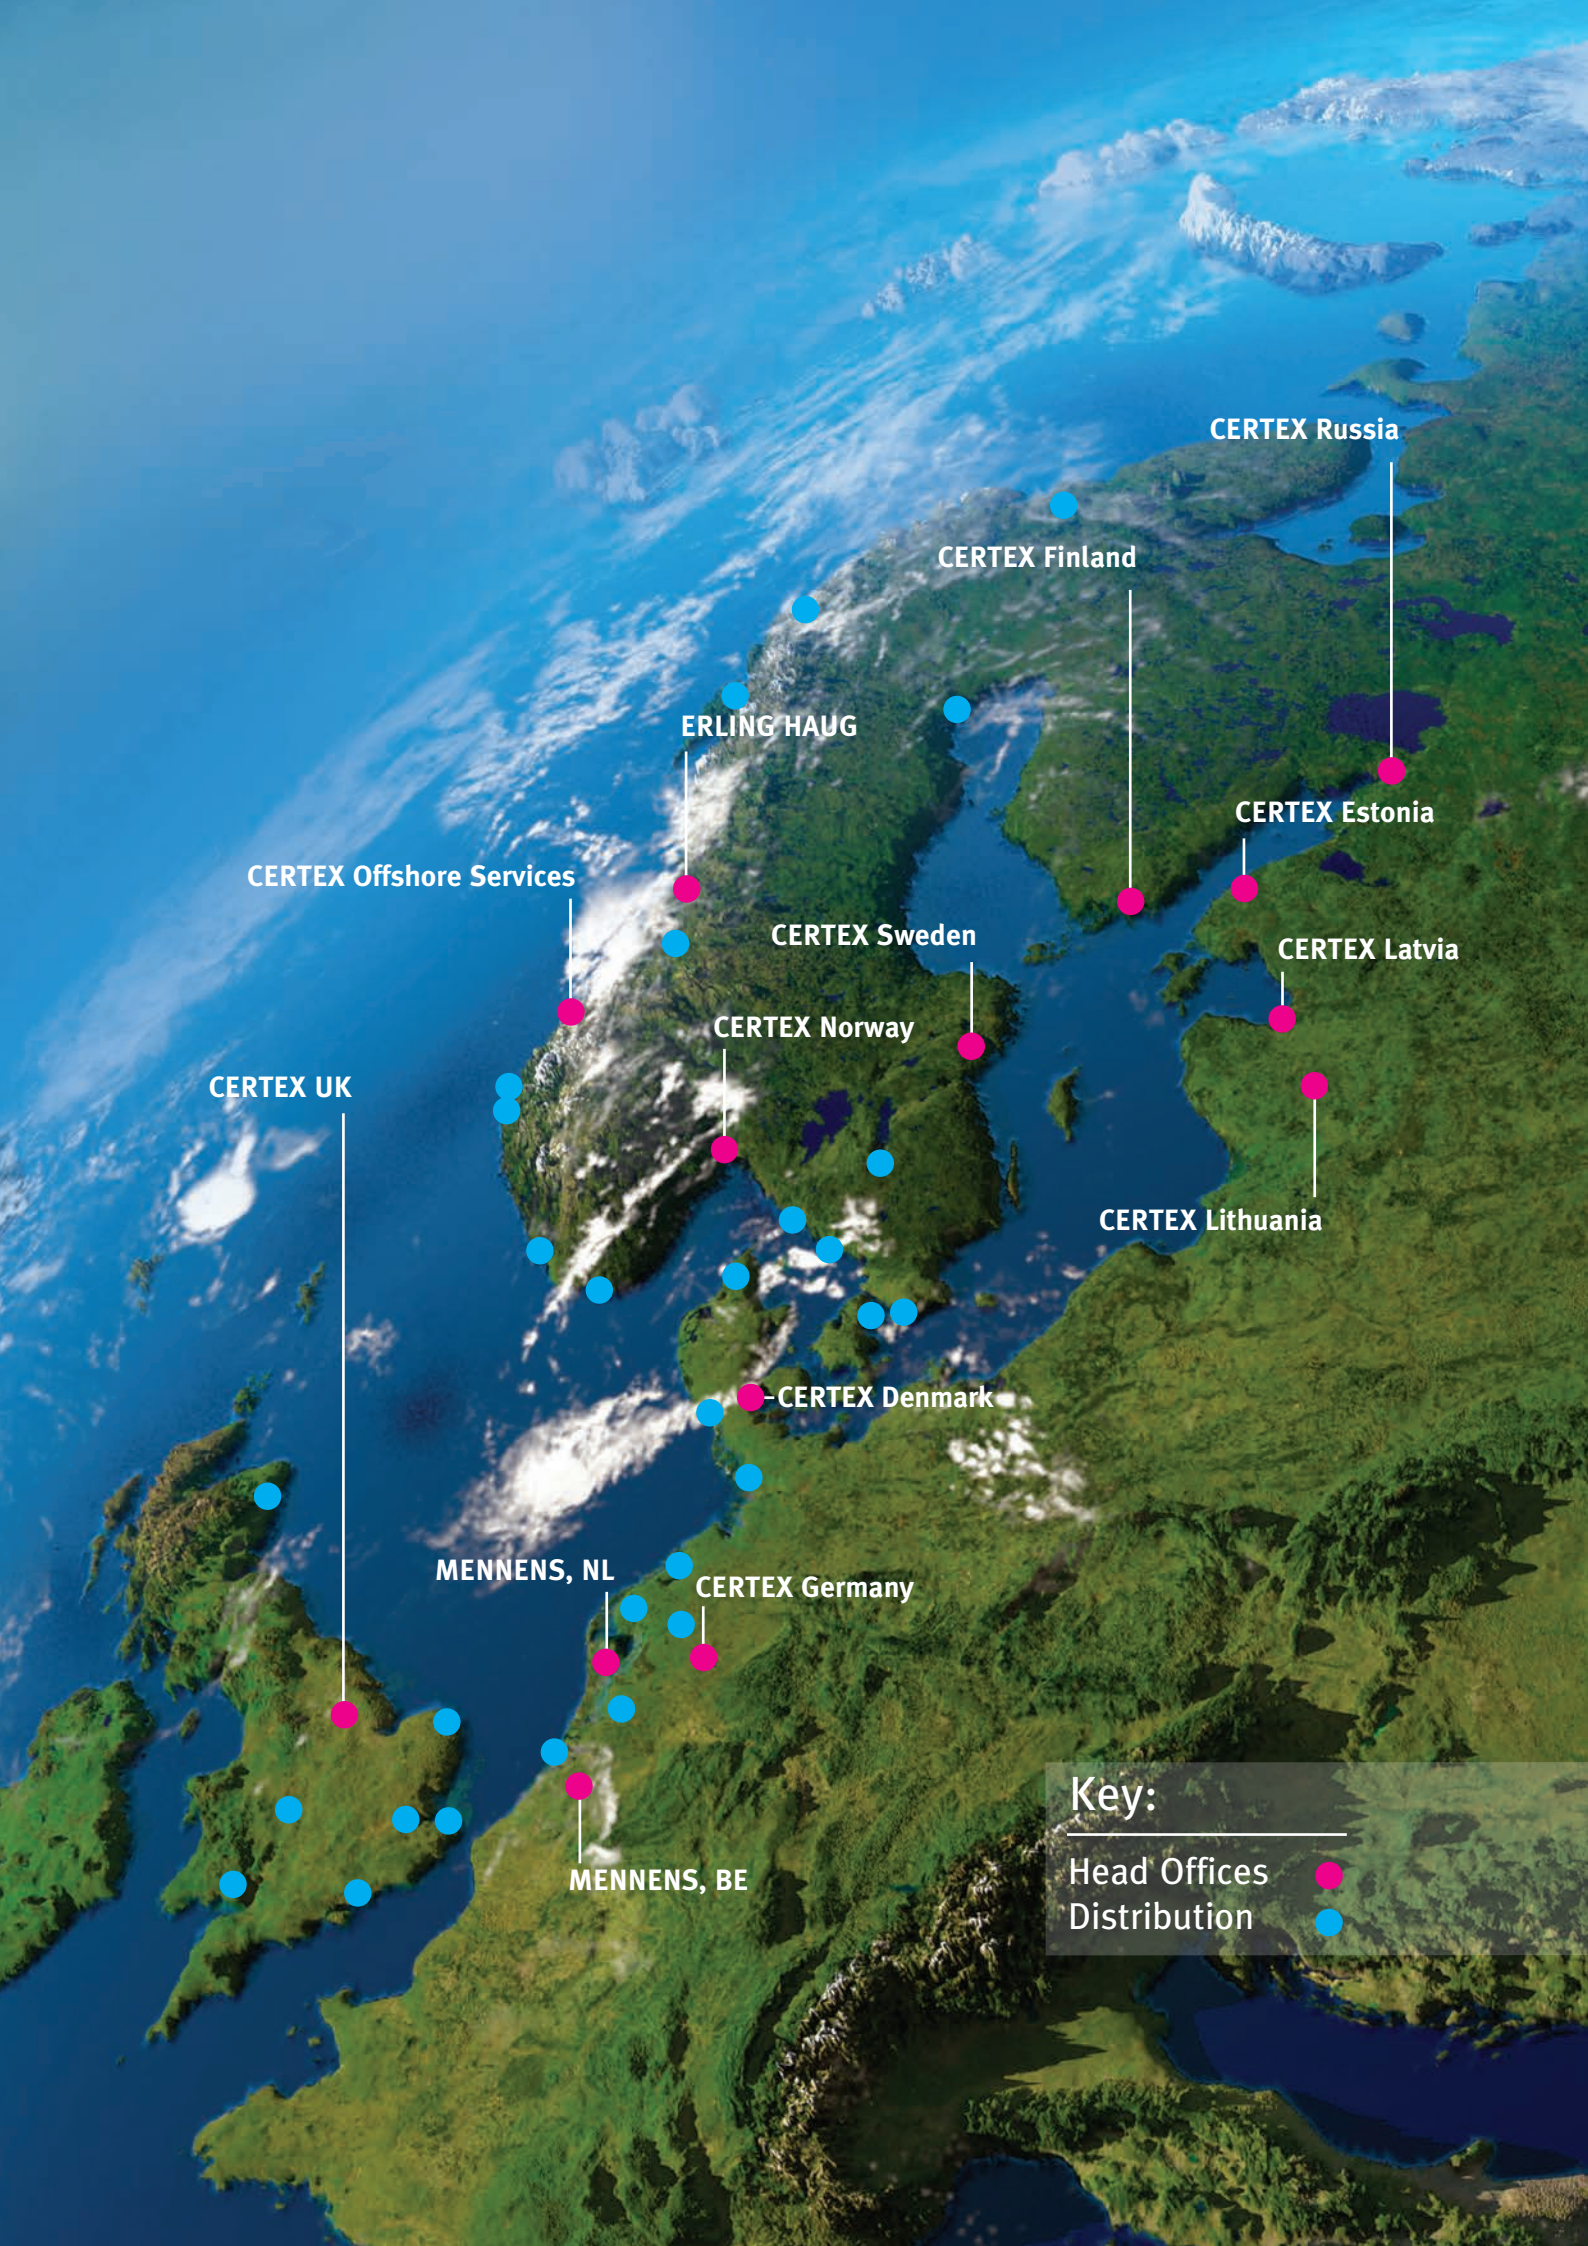

CERTEX offers a total lifting solution across Northern Europe and further still.

We are a group of companies with a presence in over 40 European locations, working together to deliver 'global standards, local service'.

Our customers gain enormously from CERTEX's collective technical knowledge and buying power, and with the support of our parent company, AxLoad, you can be confident of dealing with a genuine market leader.

Our international strength has resulted in several highly specialised engineering and design hubs supported by our own worldwide distribution system. We also have several Advanced Inspection Training Centres, alongside dedicated Centres of Excellence for R&D and NDT, and a CertMax+ Technology Centre.

Our operations are global, but our focus remains always on personal service, helped by the fact that our parent company, AxLoad, is part of Axel Johnson International, one of Europe's best-known family businesses.
