Compressive Load Cell TC-3.0 - Telemetry

Product information

DLM's Telemetry Compressive Load Cells can be used independently or in combination as part of weighing platforms. They range from 10t to 50t and manufactured using high grade stainless steel, making these load cells particulary suited to rugged environments and the hire industry amongst others. Other sized compressives can be designed upon request. Some applications include: tank weighing, silo weighing, container weighing and certification.

Features:

- 2.4GHz licence free frequency
- Ability to transmit to unlimited handheld displays
- 800m wireless range
- Remote power on/off
- Sleep mode for battery conservation
- Use the TW-3.0 Handheld to totalise load readings from multiple compressive load cells
