

PEDESTAL CRANE EXAMINATION

AIM

The course is specifically aimed at providing crane engineers with the information and techniques for thorough examination of pedestal cranes. The course covers the following areas:

- Current Legislation
- General Safety Precautions
- Crane Examination
- Access/Egress
- Primary Load Path Elements
- Operator Cab and Safety Devices
- Machinery House Equipment
- Booms/Winch drums/Wire ropes/Hook blocks

A short theory test will be taken and a practical examination to ensure safe practices are used is a major part of the course. A certificate of attendance will be issued which aids in addressing the various legislative requirements placed upon employers to ensure their employees are competent. The course includes a substantial handout for future reference.

LOCATION

The course is generally held at our Certex Aberdeen offices, however we are able to utilise other Certex sites around the country and also hold courses at your site if adequate facilities are available.

DURATION

The standard course held at our Certex Aberdeen Office is intended to last 3 days. Bespoke courses or courses held at your own premises will be discussed upon application.

FURTHER COURSES & INFORMATION

Although Certex Training Services offers six standard training courses, detailed below, bespoke courses related to Health and Safety in the workplace and Lifting Equipment can be produced to your requirements.

Further information can be found on our web site www.certex.co.uk/uk/training or by contacting our sales team on 0845 230 7475.
