

RIGGING LOFT MANAGEMENT

AIM

To provide delegates with greater knowledge and understanding of the legal and practical requirements of running and controlling a rigging loft onboard an offshore or a shore based workplace.

The course is considered suitable for those having little or no knowledge of rigging loft management, as well as those more experienced individuals wishing to update their certification. The course includes maintenance and inspection of loose lifting equipment generally found in all rigging lofts.

The course includes both practical and written assessments and if successful a certificate of completion will be issued which aids in addressing the various legislative requirements placed upon employers. A substantial course handout will be issued to each delegate for future reference.

LOCATION

The course is generally held at our Head Office at Harworth, however we are able to utilise other Certex sites around the country and also hold courses at your site if adequate facilities are available.

DURATION

The standard course held at our Head Office is intended to last two days. Bespoke courses or courses held at your own premises will be priced upon application.

FURTHER COURSES & INFORMATION

Although Certex Training Services offers a number of standard training courses, detailed on our web site, bespoke courses related to Lifting Equipment can be produced to your requirements.

Further information can be found on our web site www.certex.co.uk/uk/training or by contacting our sales team on 0845 230 7475.
