The Lifting Knowhow S01 E10 Shackles

This set of videos show you the essential products you can use to work safely at height dependant upon the application of your work. Different harnesses and lanyard combinations allow work which can either restrict you from an area or risk or manage that risk depend on your work. e.g. if you have to work suspended at height we have comfortable harnesses which allow for working using essentials such as leg supports and additional hooks for essential tools to perform your work correctly. This videos will show some of the basics safe working techniques, contact us to speak to our expert manufacturers such as Powertex or Skylotec.
