

Porta-Gantry

Product information

4:1 strength to weight ratio, high tensile alloy compared with steel
 Rapid assembly – dismantles into 3 portable parts on 4 bolts
 Ease of transportation – of van or trailer
 Flat-packability – A -Frame legs fold-in for more compact transport or storage.
Safety features
 Beam section has great torsional stability compared to I sections.
 Captive beam trolley is inherently safe.
 Trolley friction brake
 Ease of handling
 Simple height & span adjustment
 Castor wheels are 360° swivel locking with anti-scutt polyurethane tread
 Carry handles to beams.
 Finger grips on custom beam and leg sections.
 Anodised alloy surface finish as standard
 Suitable for clean environments.
 Corrosion resistant – low maintenance.
 Manual handling compliance – without mechanical aids

Features: Lightweight & Portable
