Steel Wire Rope Ropetex 88

Product information

ROPETEX

Superior bending fatigue life when compared with conventional low rotation ropes - confirmed by laboratory testing and field performance
Excellent resistance to crushing and abrasion resulting from the overall compactness and toughness of the rope and the Compacted strands - recommended when multi-layer spooling is involved.
Reduced elongation results from increased steel content and the Compaction of the strands.
RopeTex Crane Ropes are lubricated with the very latest High Performance crane rope lubricants to give excellent corrosion protection, fatigue life combined with low fling off.

Standard: EN 12385-4
ISO 4309 Rope Category No: 10-19mm **RCN.23-1**, 20-42mm **RCN.23-2**, 44-80mm **RCN.23**

Features: Strongest of all crane ropes in low rotation and rotation resistant RopeTex product range Very Low Rotation - compared with other crane ropes in the RopeTex range confirmed by extensive fiel
Material: High Carbon Steel
Marking: On Termination ID and CE mark
Finish: Galvanised as standard

Fill factor: 0,76
RCN: 23-1
