

## Flare Boom Installation

Flare boom installation and removal can be a dangerous task and it is essential that this is performed by competent personnel.

Certex employ a team of highly experienced Offshore Engineers competent in the rigging, installation, testing and removal of flare booms worldwide.

All Certex engineers are multi-disciplined covering Non Destructive Testing, Lifting Equipment Examinations, Level 3 Rigging, Load Testing, Lifeboat Davit Inspection and Testing, Crane Examinations, and Rope Access Works.

## Installation?

Our specialist engineers can help. Enter your details below for a quick enquiry.
