Services

We offer statutory Inspections, Installation, Testing and Repair of products within a WTG (Wind Turbine Generator) on both on and offshore wind farms, installation vessels, tool containers and lifting stores.

This includes but not limited to:

- [LOLER & PUWER](#) Inspections
- [Fall Arrest Inspections](#)
- [PFPE Inspections](#)
- PSSR Pressure Systems
- Lift Inspection & Maintenance
- Crane/hoist Inspection & Maintenance
- Davitt Inspection & Maintenance
- Loose lifting Inspection
- Ladder Inspection
- BAFE Inspection on Fire Extinguishers
- Bloc stop inspection
- NDT (Non Destructive Testing)
- Commissioning of lifts
- Data management (with our bespoke software CertMax+)
- Pre-Assembly work packages (of a wind farm).

Our engineers have gone through accredited training and working closely with inspection bodies & manufactures to ensure that we are competent and compliant in all tasks.
