

## Renewables Inspection Engineers

**We're hiring**

**Inspection  
Engineer**

Certex are looking for Experienced Renewables Inspection Engineers for a 6 month Permanent contract, working on various sites across the UK.

All Sub-contractors welcome

The role will be part of our Renewables Division of Certex (UK), which is a part of the largest lifting supply chain in Europe, with a network of sales, service and training facilities currently in 13 European countries.

**The role will involve:**

Statutory Inspections on Onshore and Offshore windfarms across the UK.

**Expectations of role:**

Work without supervision and have opportunities to travel throughout UK and Europe.

To work accurately and in an organised manner to tight & often shifting deadlines from our clients.

As the business has been steadily growing, we expect scope for progression within the sector.

**Experience and Qualifications would be an advantage, but training would be provided for the right candidates.**

- LEEA Diploma – Entry level
- Prior experience of testing & inspection work
- GWO accreditation for working offshore and onshore
- Experience in the following preferred but not essential
  - **Service Lifts**
  - **Davit Cranes**
  - **Electric Hoists**
  - **Pressure Systems**
  - **Working at height equipment**
  - **TMSE**

The salary will be competitive and based on your experience and qualifications.

Certex UK forms part of the AxInter group (a group of family owned companies). We aim to attract the best people and keep them. Responsibility and trust are the cornerstones of how we motivate our employees, each year we have a thorough appraisal with each member of staff discussing their opinions through to requests from further training to experience.
