Ropeblock

Ropeblock hardware is found worldwide wherever key components in crane systems are in contact with the wire rope. Our products are designed to contribute to consistent safety and efficiency in any type of lifting & rigging application. We have extensive knowledge of blocks, sockets, and rigging gear, with unique value being added by our Smart Engineering approach.

This combination is our key to providing solutions that deliver. We manufacture and globally distribute thousands of blocks and tens of thousands of sheaves and sockets a year.

Ropeblock is a globally renowned developer and manufacturer of lifting and rigging hardware.

Market leading crane manufacturers as well as large end-users call upon our expertise to meet the specific challenges they are faced with. Our products are used in critical equipment such as mobile cranes, port cranes, ship cranes, offshore cranes and platforms, dredging equipment, pendant structures, mooring systems and in the heavy industry.

Ropeblocks Smart Engineering approach – an overall corporate philosophy, really – is aimed at creating benefits for our customers and, in turn, their customers. Ropeblocks engineers are constantly pushing the envelope in terms of product design, materials, finishing, production methods, applications, and certification requirements. Besides functionality, our products are designed for smooth production and assembly. Consistent quality is assured by our ISO 9001 QMS, and Ropeblock products can be supplied with any certificate/document you desire or require.
