Fall Arrest Blocstop™ BSA

Product information

An additional safety system in accordance with EN 1808 is mandatory in man riding applications. The system is used to secure the work l That is precisely what our Blocstop does. They are small, light and compact and attached to the working platform where the safety rope r
BSA – Blocstop for the detection of inclination of the platform or slack of wire rope:
supported to the BSA and BSA clamping jaws the suspension rope breaks the platform by monitoring the BSA suspension rope. The B In precisely the same way as the BSO, the clamping jaws clamp the safety rope and prevent the load or the platform from falling.
Despite this, the BSA does not allow a sagging of the suspension rope and before the platform reaches a critical angle, the system to monitor the tilt of th
