

Ergogrip SK16 Skylotec L-0280

ERGOGRIP is a fall-arrest device that enables the length to be adjusted, ensuring safe and flexible positioning while working. The hands are therefore free. It can be used as a follow-on fall-arrest device or as a holding rope. When used as a catching system, it can prevent falls and even, if it comes to it, is able to catch a fall. The special core-sheathed rope can bear heavy loads. It is edge-proof, abrasion-resistant and remains soft and flexible even when wet. The special, self-adhesive shrinkable tubing made of resilient polyolefin is also abrasion-resistant and hard-wearing.

Marking: According to standard, CE-marked, Supplier symbol, product id, art no, serial no, production year, standards, max. load.

Temperature range: -35°C to 45°C.

Standard: EN 353-2 + EN 358
