## Product information

End Stops for crane rope applications.  
Type ESP has an inspection hole and is prepared for an RFID chip and gives the possibility to check tests and certificates of the product.  
**Features:** End stops are designed for full load applications but the stress resistance is large due to the chamfered surface around the end stop.  
The end stop is specifically designed for end stop applications on standard and non-standard ropes with a diameter between 60 and 160 mm.
