Lifting Equipment Examination

Providing an overview of the examination of in-service equipment as required by the Lifting Operations & Lifting Equipment Regulations (LOLER). Additionally, the course reviews the requirements of the Provision and Use of Work Equipment Regulations (PUWER) and other related legislation. It also looks at the documentation required and multiple inspection techniques.

The course covers the following areas:

- Beam Clamps & Trolleys
- Shackles
- Wire Rope slings
- Eyebolts
- Jaw Winches
- Jacks
- Level Operated Chain Hoists
- Chain Blocks
- Webbing & Round Slings
- Chain Slings & Hooks
- Plate Clamps
- Rigging Screws
- Swivel Hoist Rings
- Wedge Sockets

Ensure competency and compliance:

Trainees will complete a theory and practical examination, if successful a certificate will be issued. This will help the Employer address certain legal requirements by being able to demonstrate employee competency. Please note training may be provided onshore only.
