Lifting & Slinging **LEEA** Accredited

Certex safe slinging and lifting course provides an introduction to users of lifting equipment with safe techniques and lifting operations.

The course covers the following areas:

- Current Legislation
- Equipment Selection
- Banksman Duties and Signals
- Pre-Use Inspection and Safe Use
- Sling Angles
- Planning of Lifting Operations
- Load Calculations
- Risk Assessments
- Sling Configurations
- Load Security

Ensure competency and compliance:

Trainees will complete a theory and practical examination, if successful a certificate will be issued. This will help the Employer address certain legal requirements by being able to demonstrate employee competency. Please note training may be provided onshore only.
