

TR54 - MOBILE CRANE EXAMINATION - 2 DAYS

COURSE AIM

The specific aim of this course is to provide engineers with the information and techniques for the thorough examination for most types of mobile crane.

Although a basic course, the content is quite substantial and covers the following areas: -

- Current Legislation
- General Safety Precautions
- Crane Examinations
- Operators Cab & Safety Devices
- Crane Terminology
- Hook Blocks
- Hoist Ropes
- Rated Capacity Indicators

Each course delegate will be expected to complete a written and practical examination which will include conducting a thorough examination on a mobile crane. If successful, a certificate will be issued. This will help the Employer to address certain legal requirements by being able to demonstrate employee competency. A detailed course handout is also provided for future reference.

DURATION

The standard course is intended to last 2 days. Bespoke courses can also be discussed upon application.

LOCATION

The course is generally held at the customer's own premises as a crane will be required for the course. However we are also able to utilise Certex locations if required. This can be discussed upon application.

WHAT DELEGATES WILL NEED TO BRING

Each delegate is required to produce photographic ID on the first day of the course. Failure to do so will result in the delegate being unable to attend.

If this course is held at a Certex UK location, safety footwear and overalls are required for the second day, however, if the course is to be held on a Client's site, additional PPE may also be required as specified by the Client's site safety rules.

FURTHER COURSES & INFORMATION

Certex UK offers a range of standard training courses as detailed on our web site and bespoke training courses can be tailored to suit your specific needs. Many of our standard courses are LEEA certified. For further information or to discuss your requirements in more detail, please contact our Training Team on +44 (0) 1302 756777.
