# Lifting & Slings - 2 Days LEEA Accredited

Certex Lifting and Slings course provides crane users with safe techniques for slinging and lifting operations.

The course covers the following areas:

- Current Legislation
- Equipment Selection
- Banksman Duties and Signals
- Pre-User Inspection and Safe Use
- Sling Angles
- Planning of Lifting Operations
- Load Calculations
- Risk Assessments
- Sling Configurations
- Load Security

## Ensure competency and compliance:

Trainees will complete a theory and practical examination, if successful a certificate will be issued. This will help the Employer address certain legal requirements by being able to demonstrate employee competency. Please note the course covers most types of commonly used cranes. Please ask if you have a specific requirement prior to booking.
