Mobile Crane Examination

Certex mobile crane examination course provides engineers with the information and techniques for the through examination of mobile cranes.

The course covers the following areas:

- Current Legislation
- General Safety Precautions
- Crane Examinations
- Operators Cab & Safety Devices
- Crane Terminology
- Hook Blocks
- Hoist Ropes
- Rated Capacity Indicators

Ensure competency and compliance:

Trainees will complete a theory and practical examination of a mobile crane, if successful a certificate will be issued. This will help the Employer address certain legal requirements by being able to demonstrate employee competency. Please note the course covers most types of commonly used cranes. Please ask if you have a specific requirement prior to booking.
