Rigging Loft Management LEEA Accredited

To provide delegates with greater knowledge and understanding of the legal and practical requirements of running and controlling a rigging loft onboard an offshore or onshore based workplace.

The course is considered suitable for those having little or no knowledge of rigging loft management, as well as those more experienced individuals wishing to update their certification. The course also includes basic maintenance and inspection of loose lifting equipment generally found in all rigging lofts.

Accredited Training
Company

Ensure competency and compliance:

Trainees will complete a theory test and practical examination, if successful, a certificate will be issued. This will help the Employer to address certain legal requirements by being able to demonstrate employee competency. Please note training may be provided onshore only.
